WSU CAPSTONE PROJECT 2026

OVERVIEW OF GUIDE

PrintOS is a cloud-based web application designed to help businesses and entrepreneurs achieve their marketing and product aspirations through printing software. The capstone project of 2025 to 2026 for WSU Vancouver aimed to accomplish this same feat through our own miniature version of the PrintOS application. This project was made possible with the help and guidance of the PrintOS Team at HP, namely Kendra, James, Kelvin, Thieu, and Jon. The goal of this guide is to provide users (yes, you!) with clear guidance on how to use the miniature PrintOS application. Please refer to the Table of Contents for easy reference to a specific area, or feel free to review the whole guide, whatever suits your fancy!

Table of Contents

III. The Dashboard....7

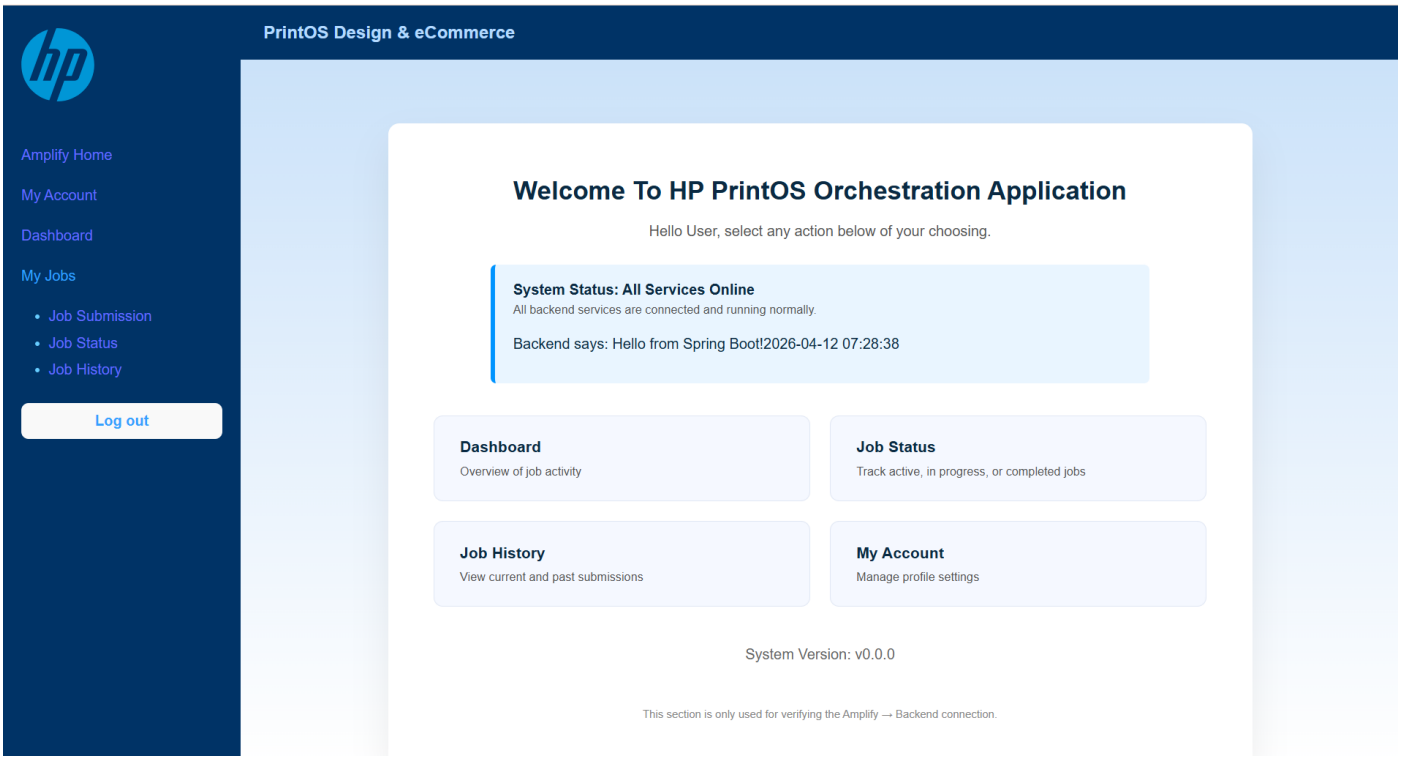
IV. Job Submission Guide....8

V. Job Status....12

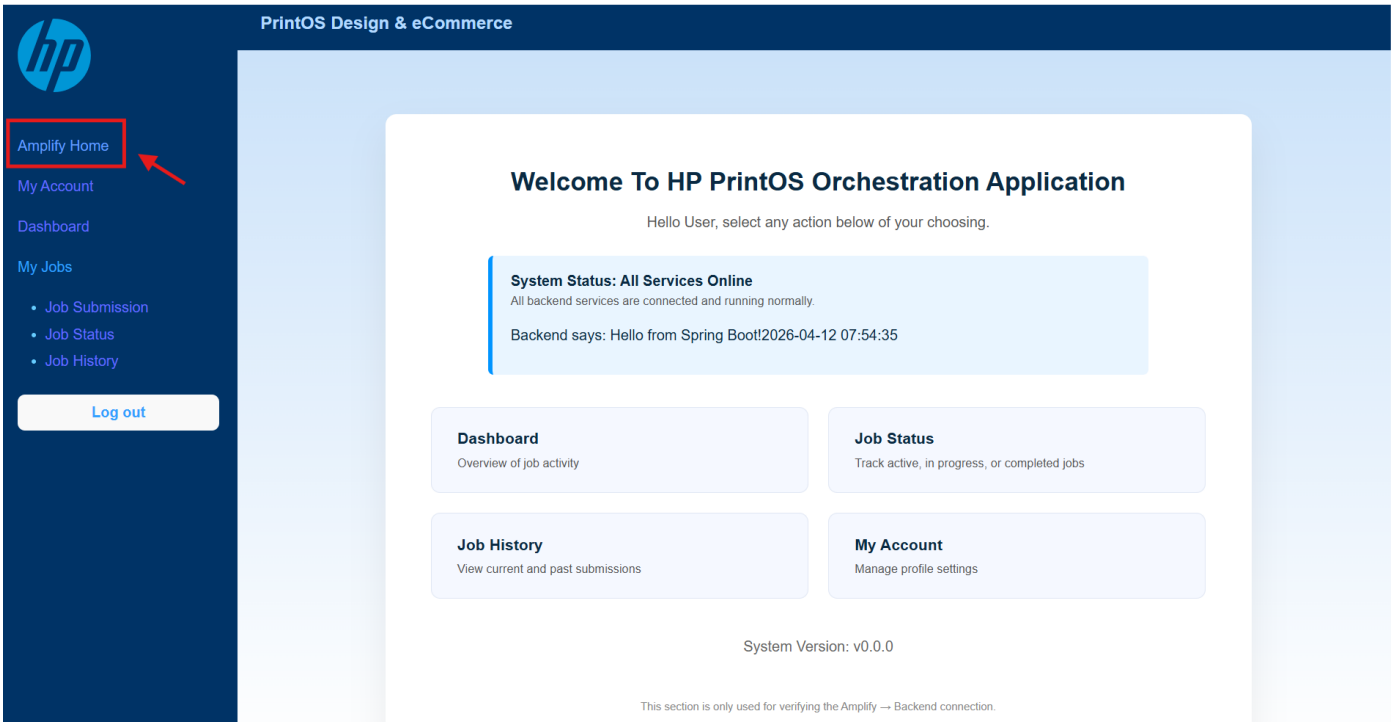
VI. Job History....15

Home Page

The home page of the PrintOS application showcases an overview of what the end user has access to throughout the whole site, such as their dashboard, job history, job status, and account page. All of these different pages host different information that can help the end user achieve their printing dreams.

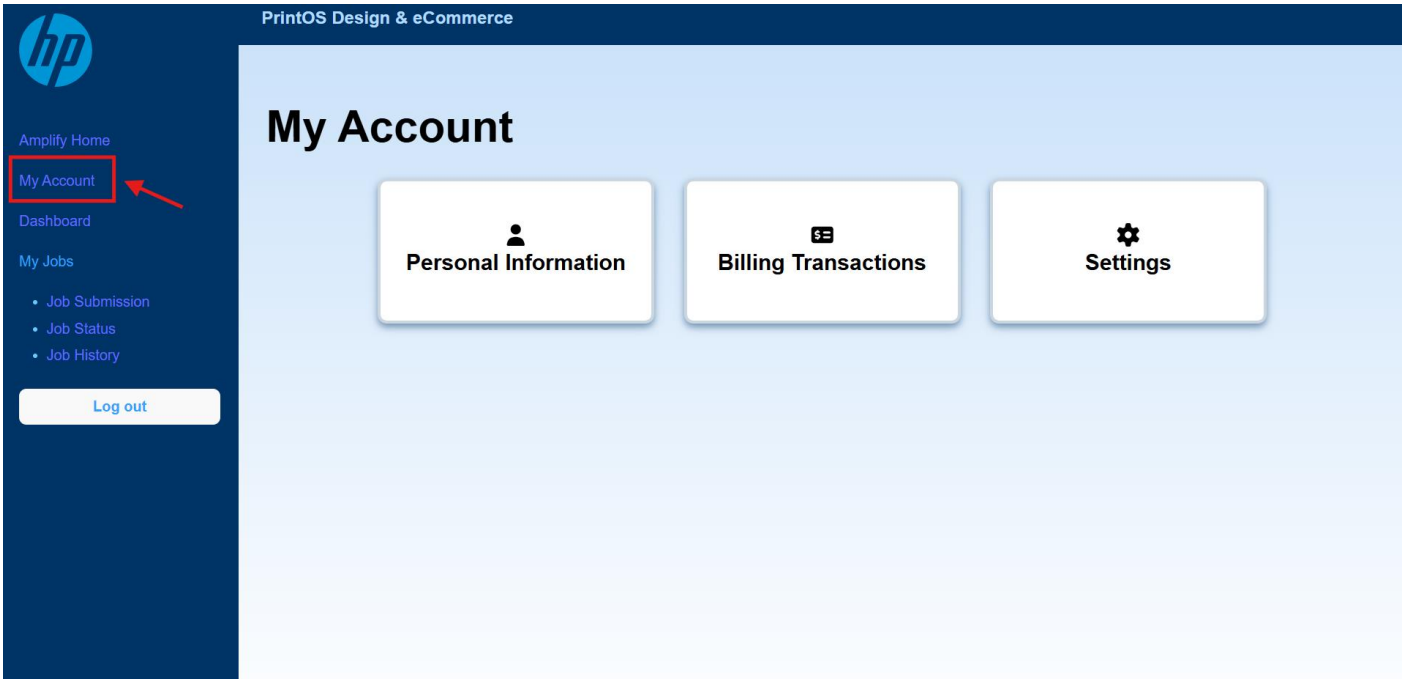


If you happen to click away from the home page, you can return to it by selecting 'Amplify Home' in the left side panel.

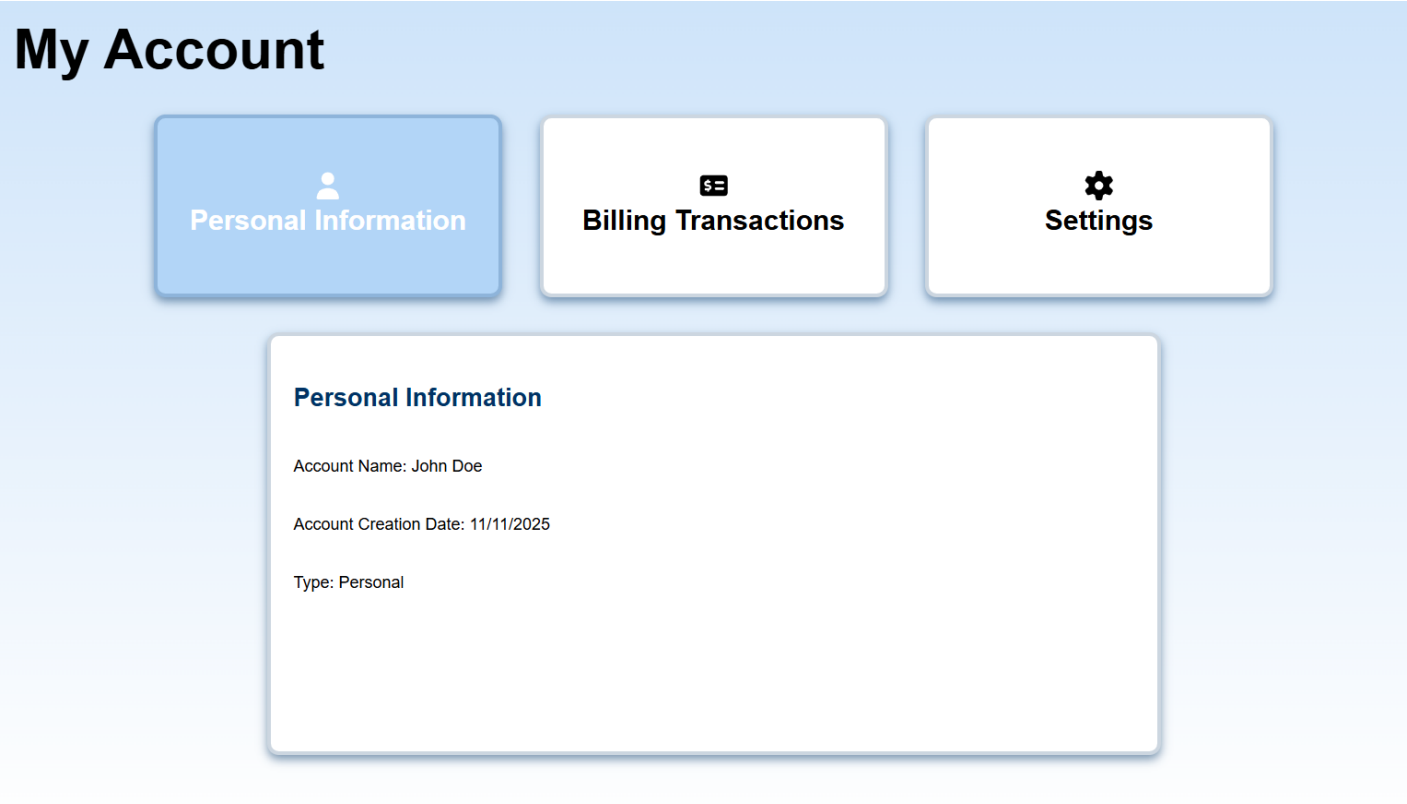


My Account Page

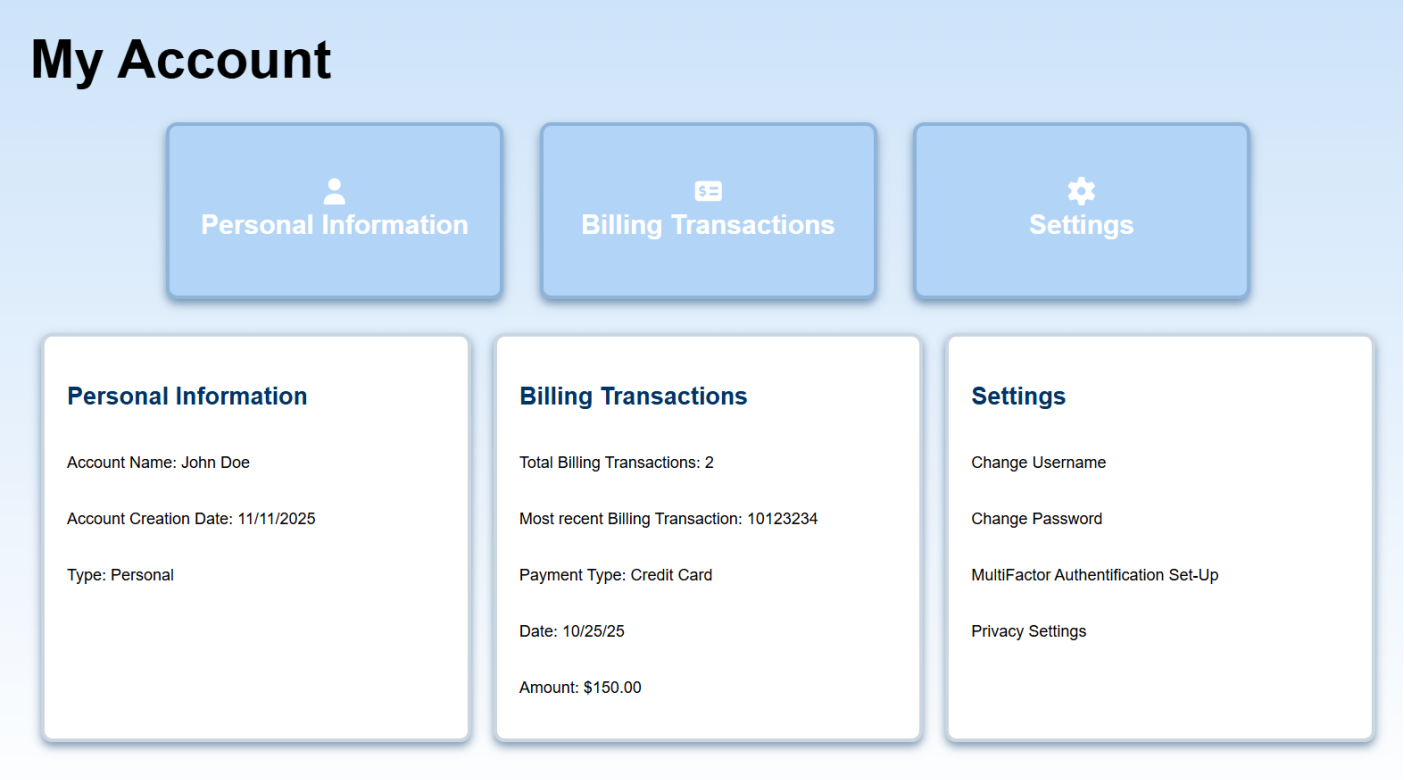
The My Account page is the perfect place to find out more about...yourself! On this page you can view your account information, billing transactions, and settings. To view each section, simply click on any one of them and it will provide a drop down of information. You can also select multiple sections at once and it will let you view the provided information.



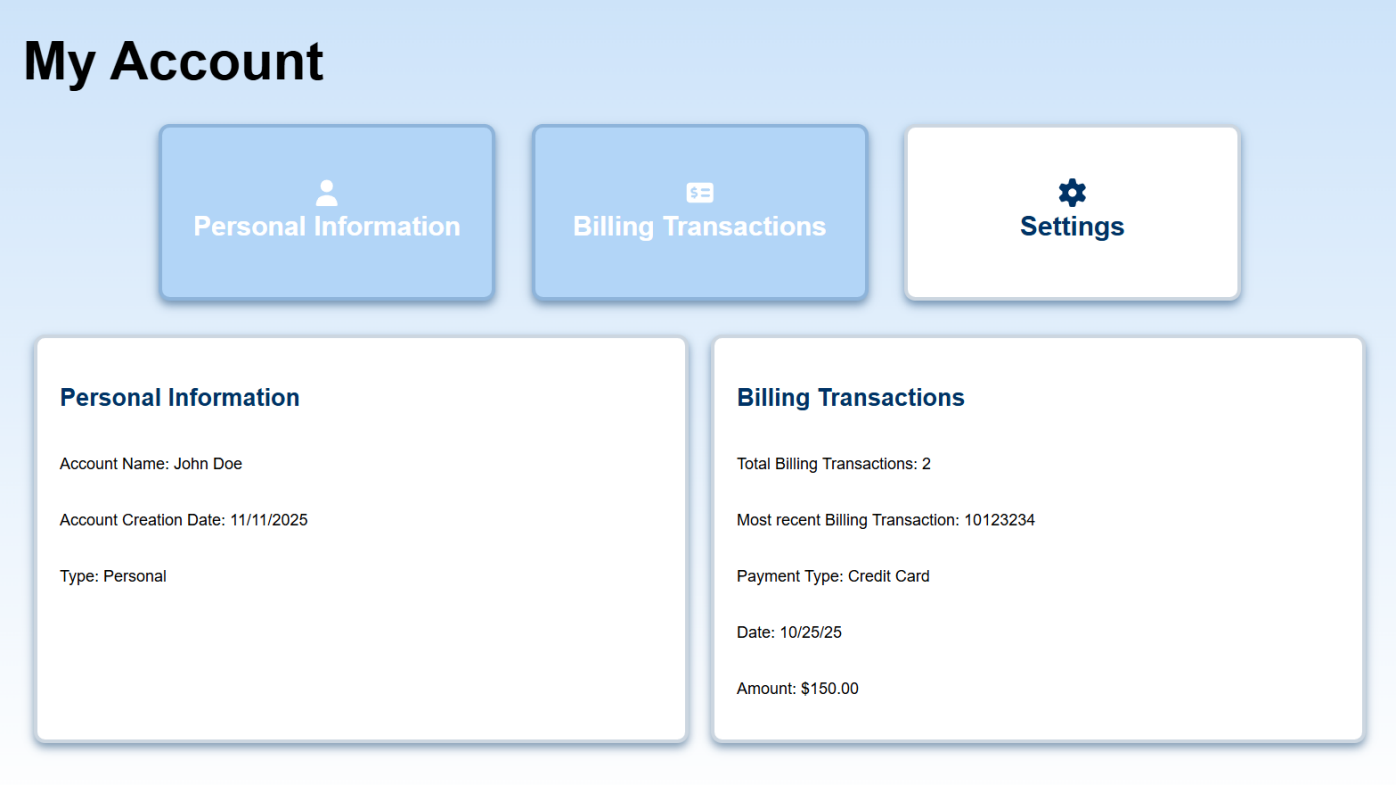
Clicking on job one section:



Clicking on multiple sections at once:

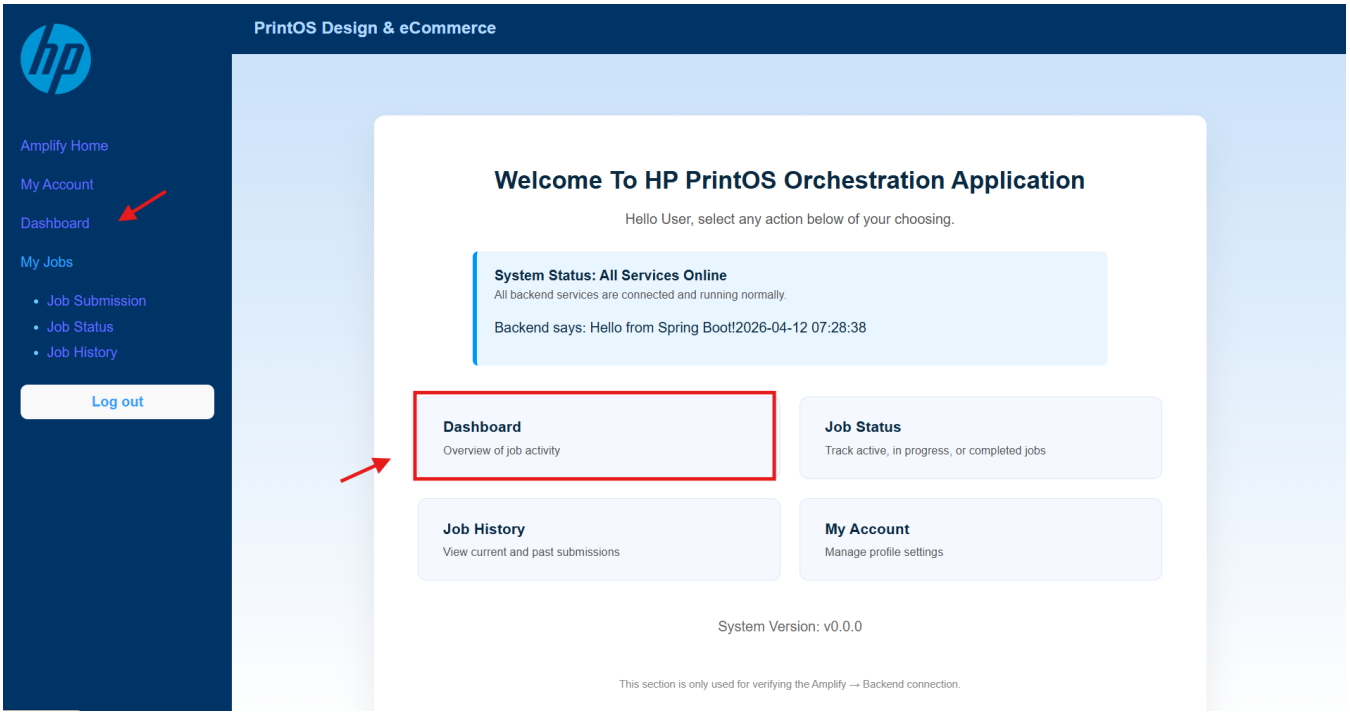


Unclicking will unhighlight the section and remove its information block.

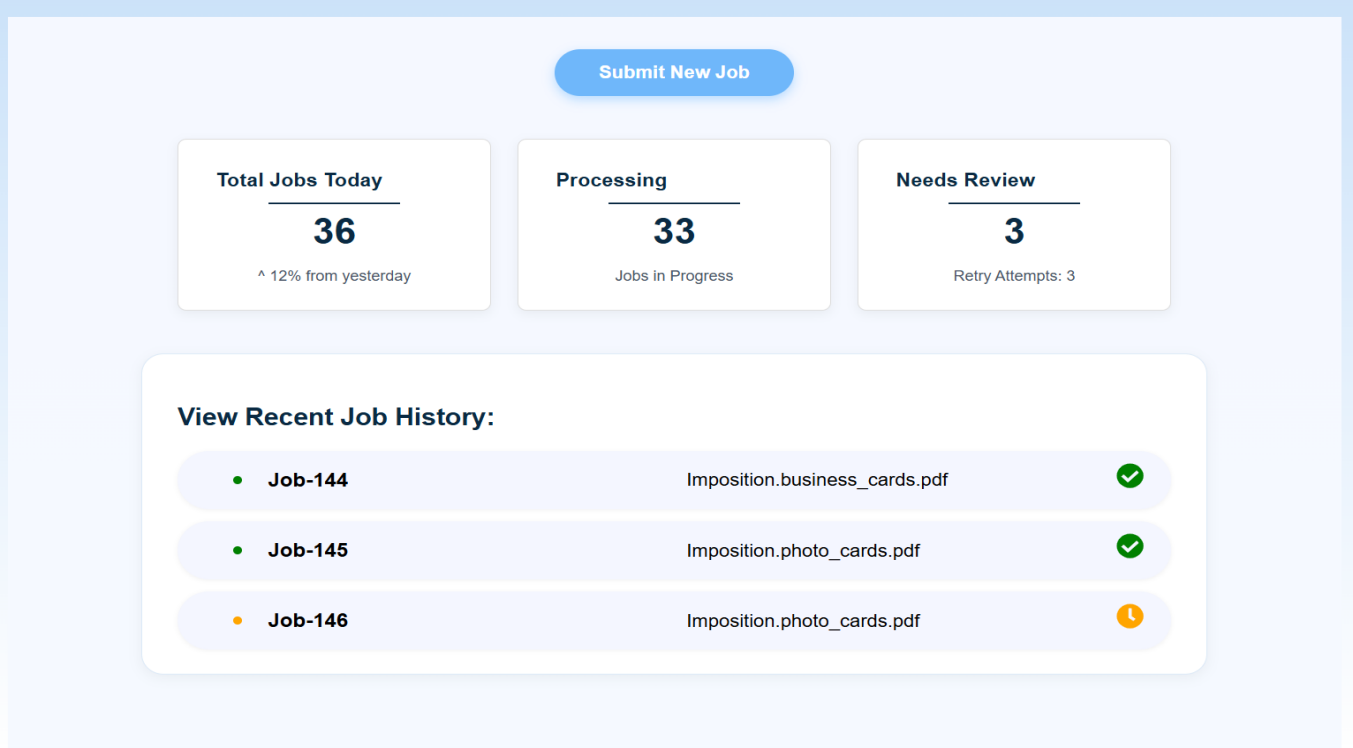


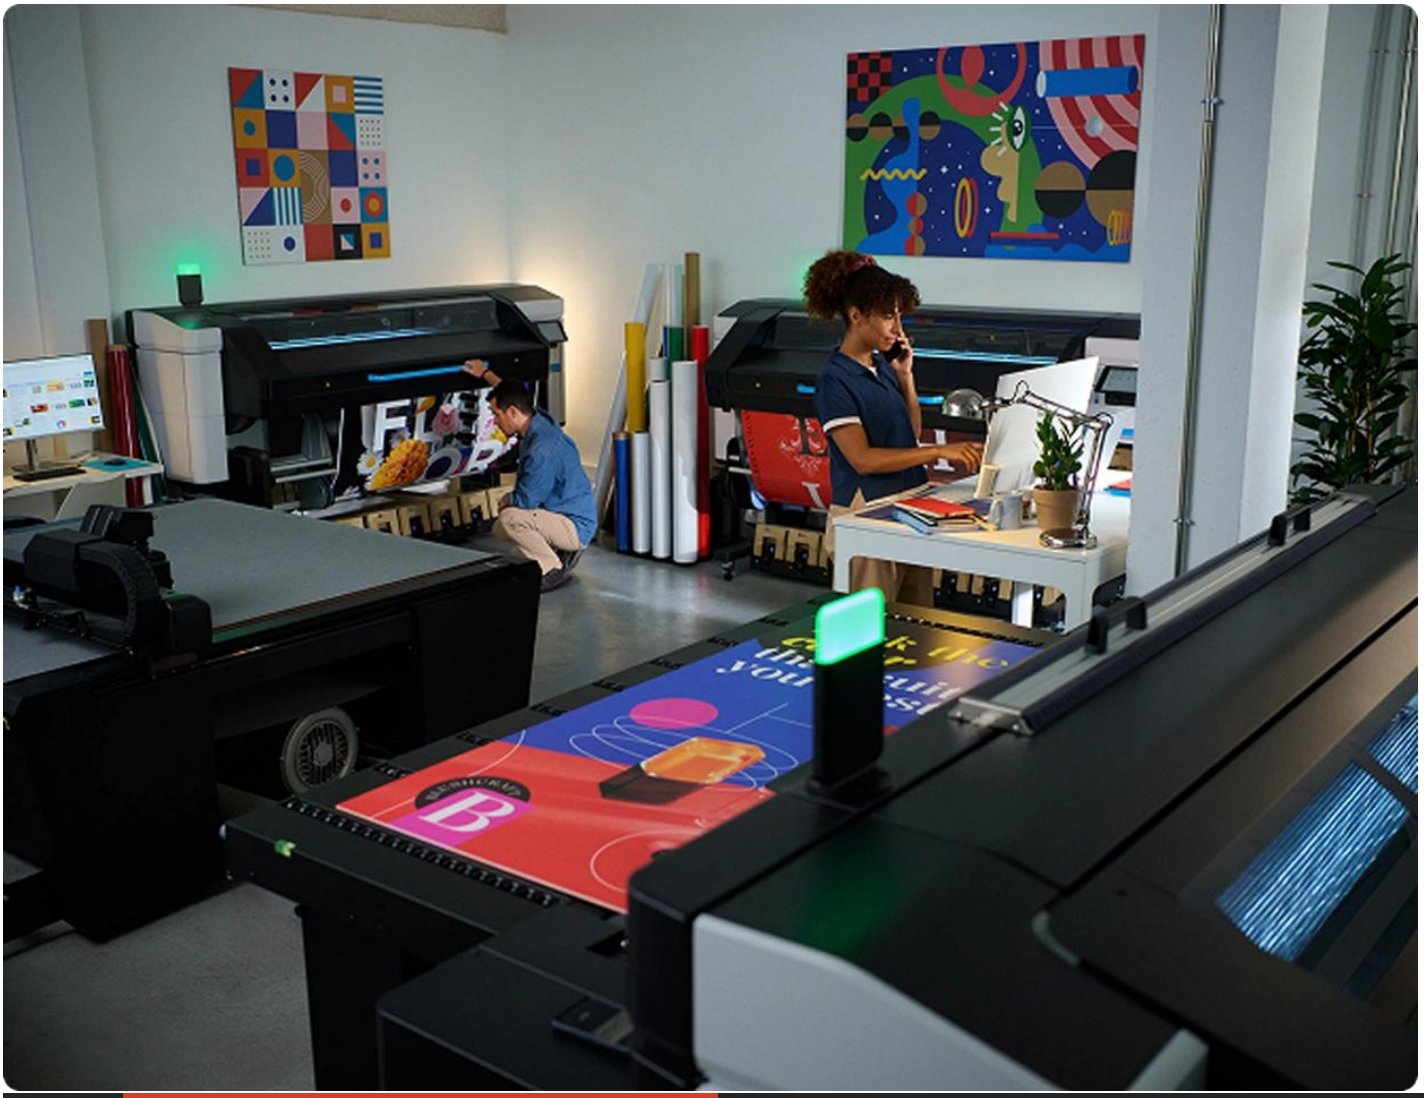
The Dashboard

The Dashboard shows you your recent job history, your total jobs created today, and your total number of jobs currently being processed or reviewed. Additionally, you can create jobs on this page by clicking 'Submit Job.' More information on how to submit jobs is in the job submission section of this guide.



To navigate to the dashboard, click on either the Dashboard tab on the side panel or on the clickable item in the main content area.





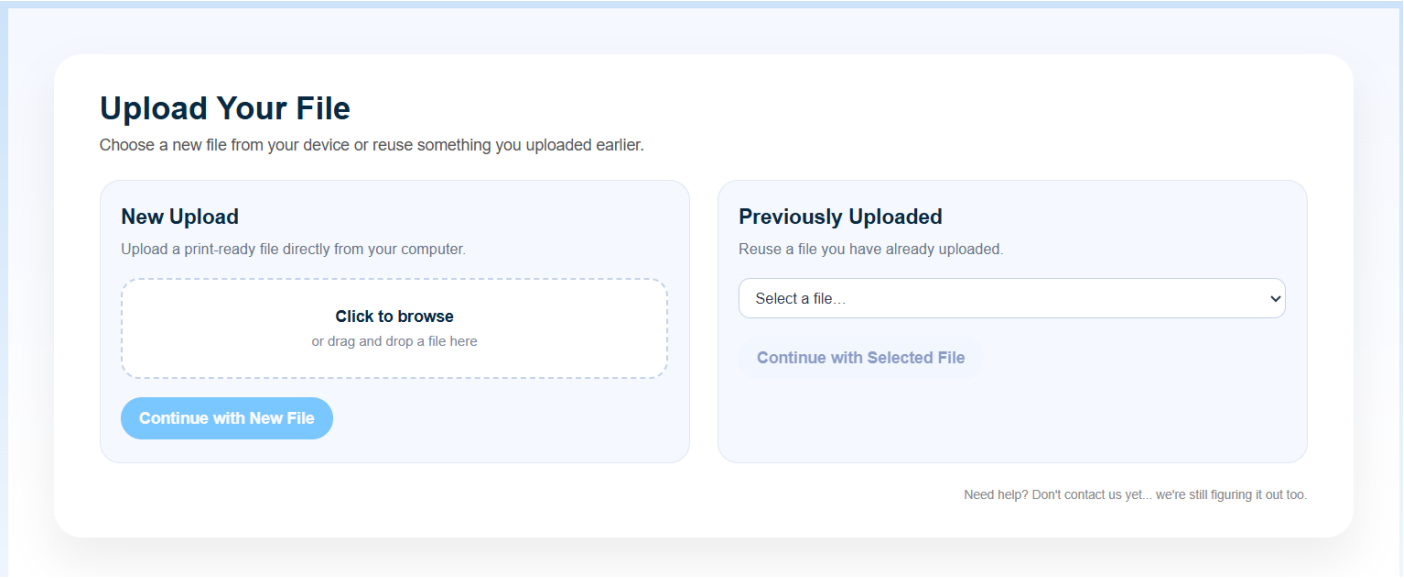
JOB SUBMISSION GUIDE

This portion of the guide contains information on the following:

- How to submit a job
- How to view job history
- How to view job statuses
- Restarting jobs
- Deleting jobs

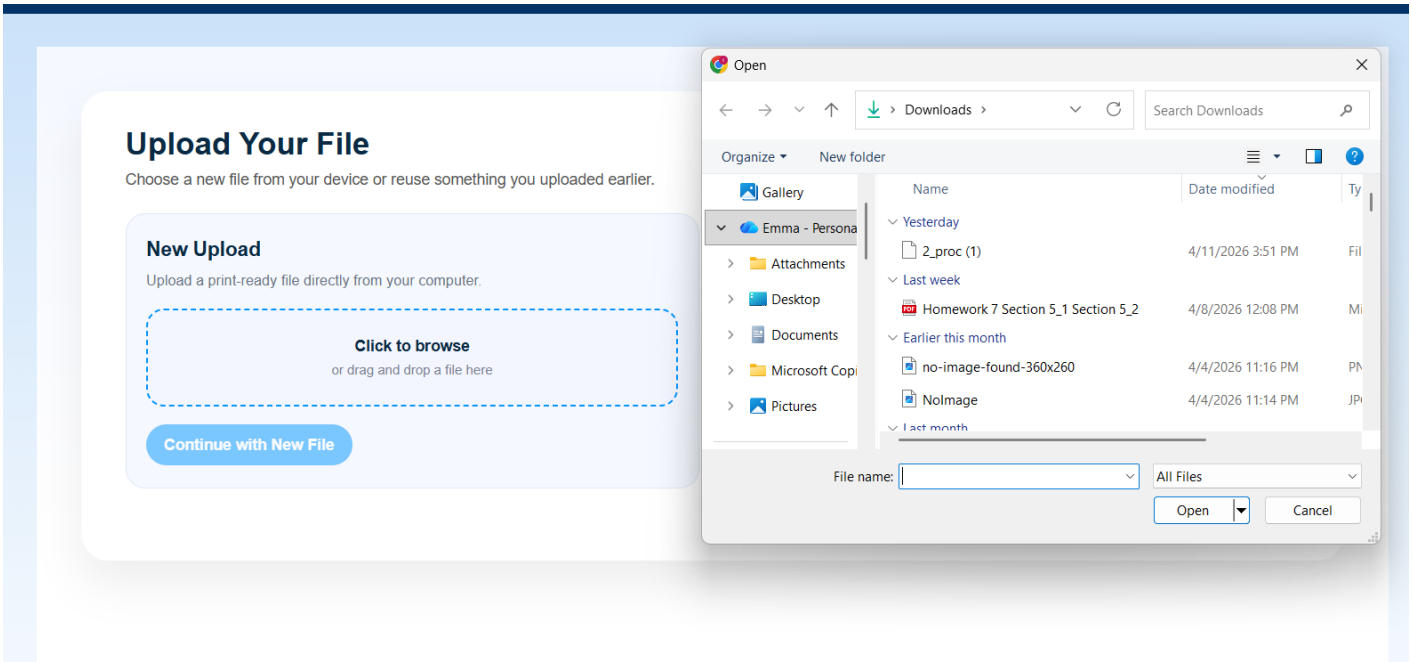
Job Submission Guide

To create jobs, you can click ‘Submit New Job’ on either the Amplify Home page, the Dashboard page, or in the Job Submission page on the lefthand side panel of the application. On this page you have the option to either upload your own file or to upload one that you have already previously uploaded.



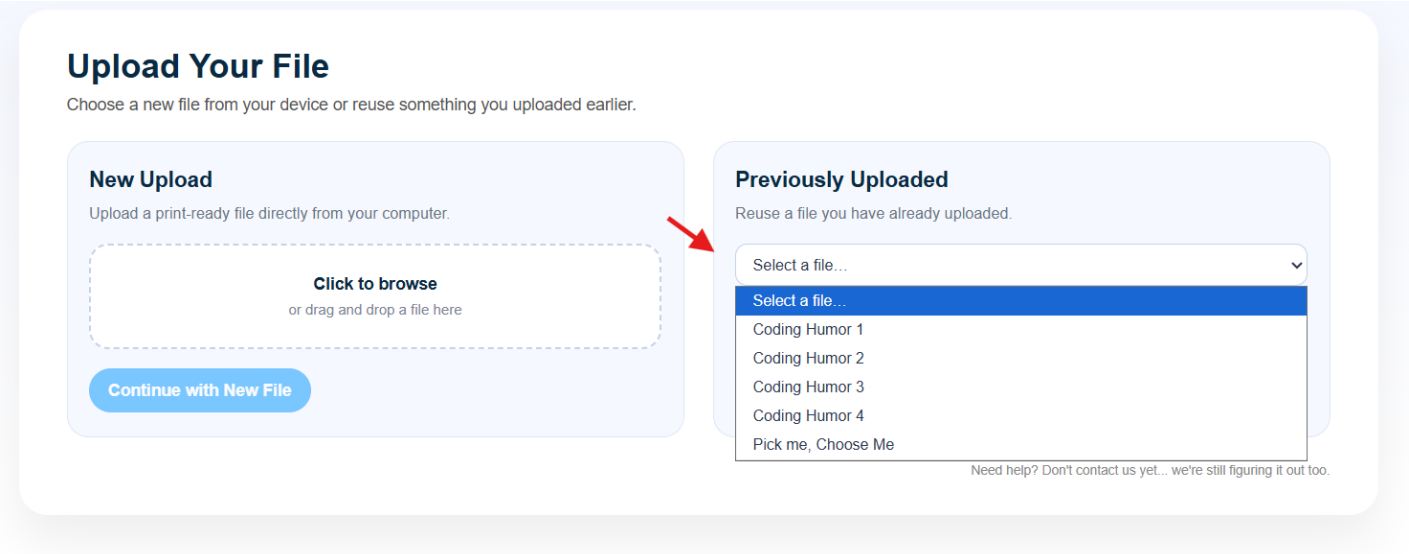
Submitting a new file:

To submit a new file, simply click on ‘Click to browse.’ This will open your windows folder, where you can select a png or jpeg file. Other file types are not supported.

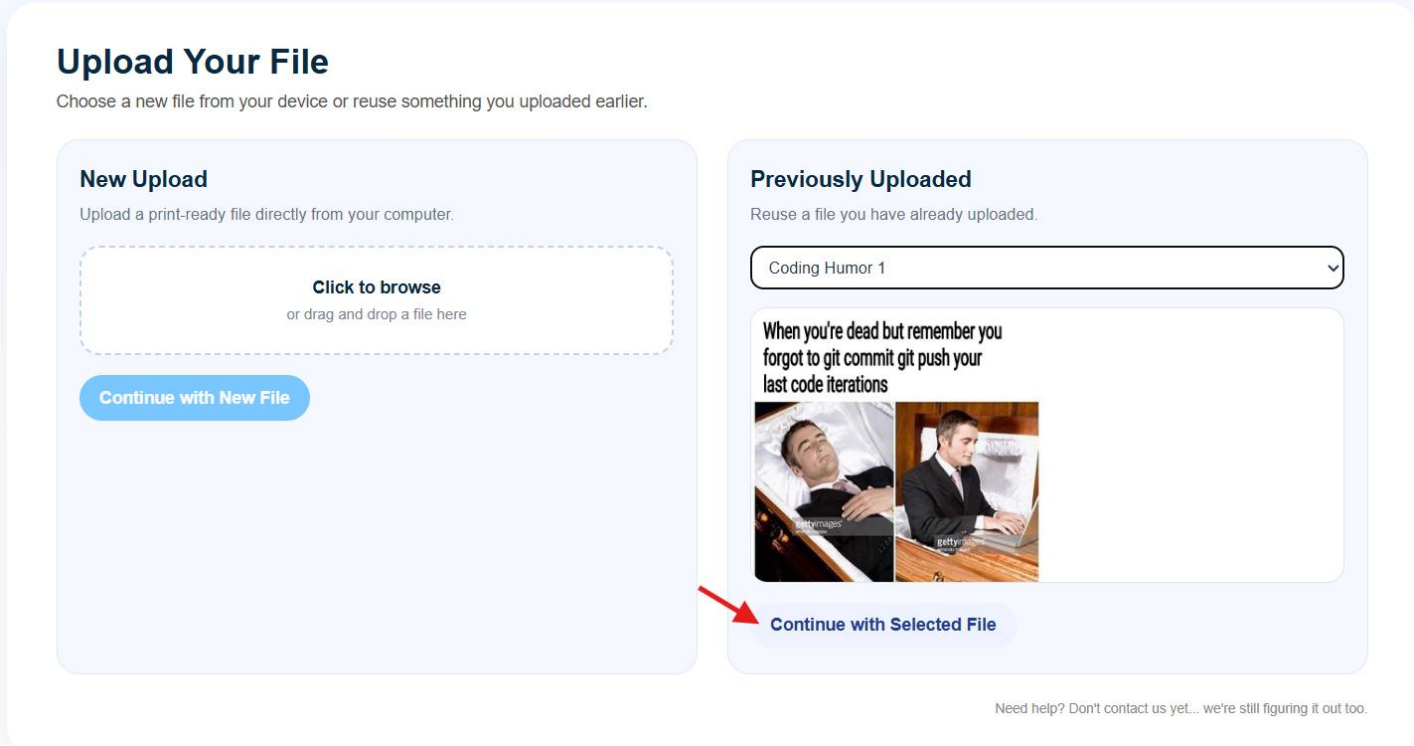


Submitting using a previously uploaded file:

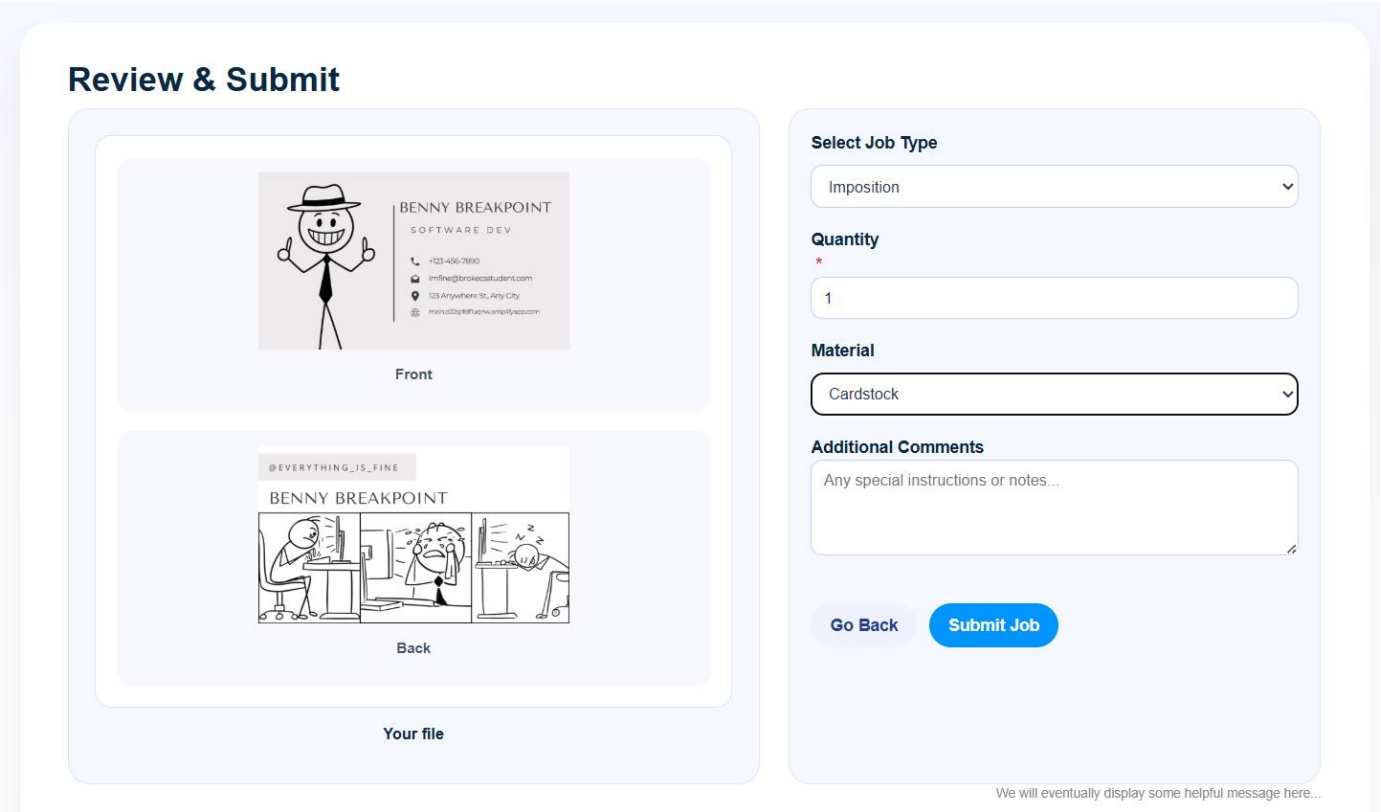
Click on ‘Select a file...’ and then your desired file (file is saved by the filename).



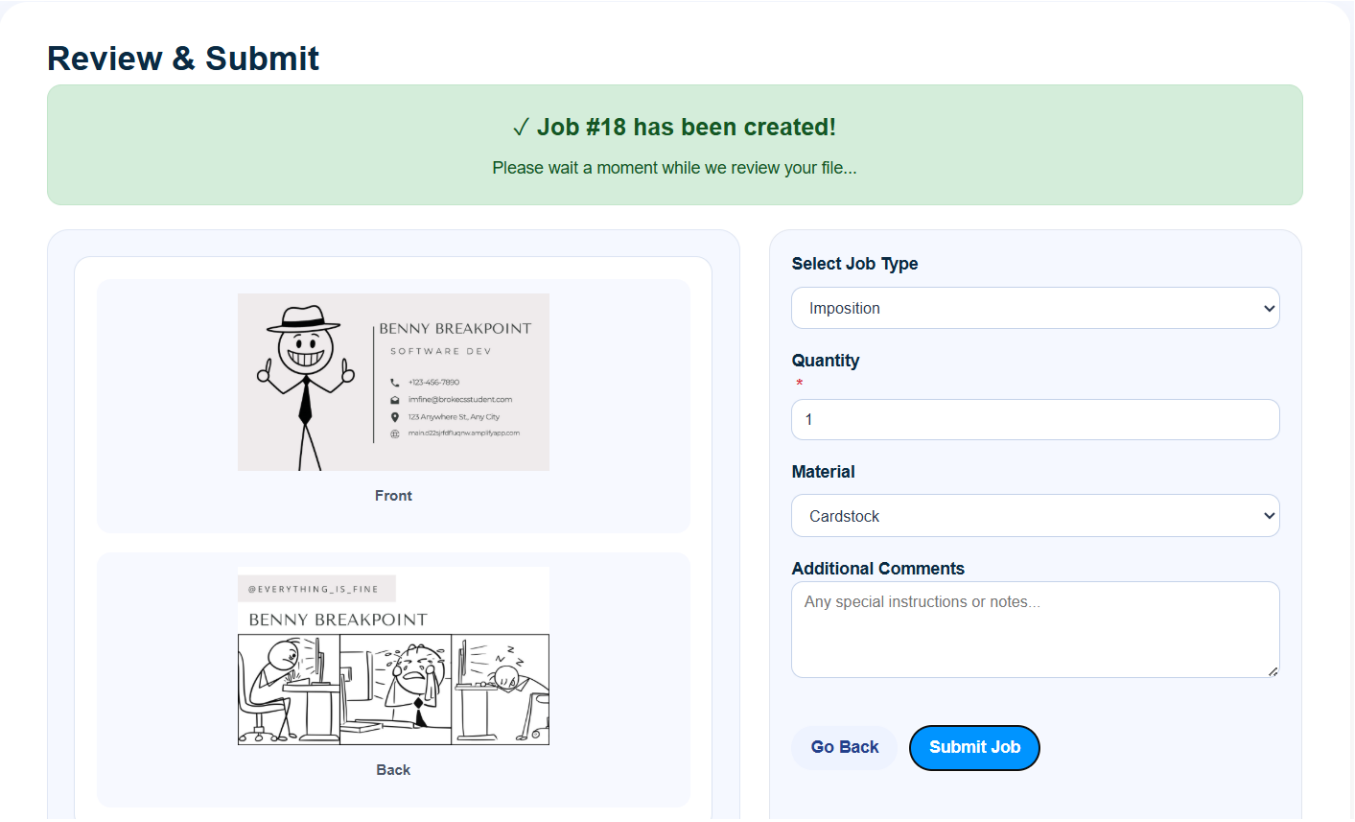
Next, click ‘Continue with Selected File.’ If the file is incorrect, click the dropdown below ‘Previously Uploaded’ and select your desired file.



After clicking ‘Continue with Selected File,’ you will be prompted to select the job type, quantity, material, and any additional comments on how you would like your job completed. Once you are ready to submit, click ‘Submit New Job.’ Otherwise, you can also go back to selecting a file by clicking ‘Go Back.’



Congrats! You have successfully submitted a job! After submitting a job it will show you the job #, which is the specific id related to your job. This id is useful if you ever need to delete your job in the future.

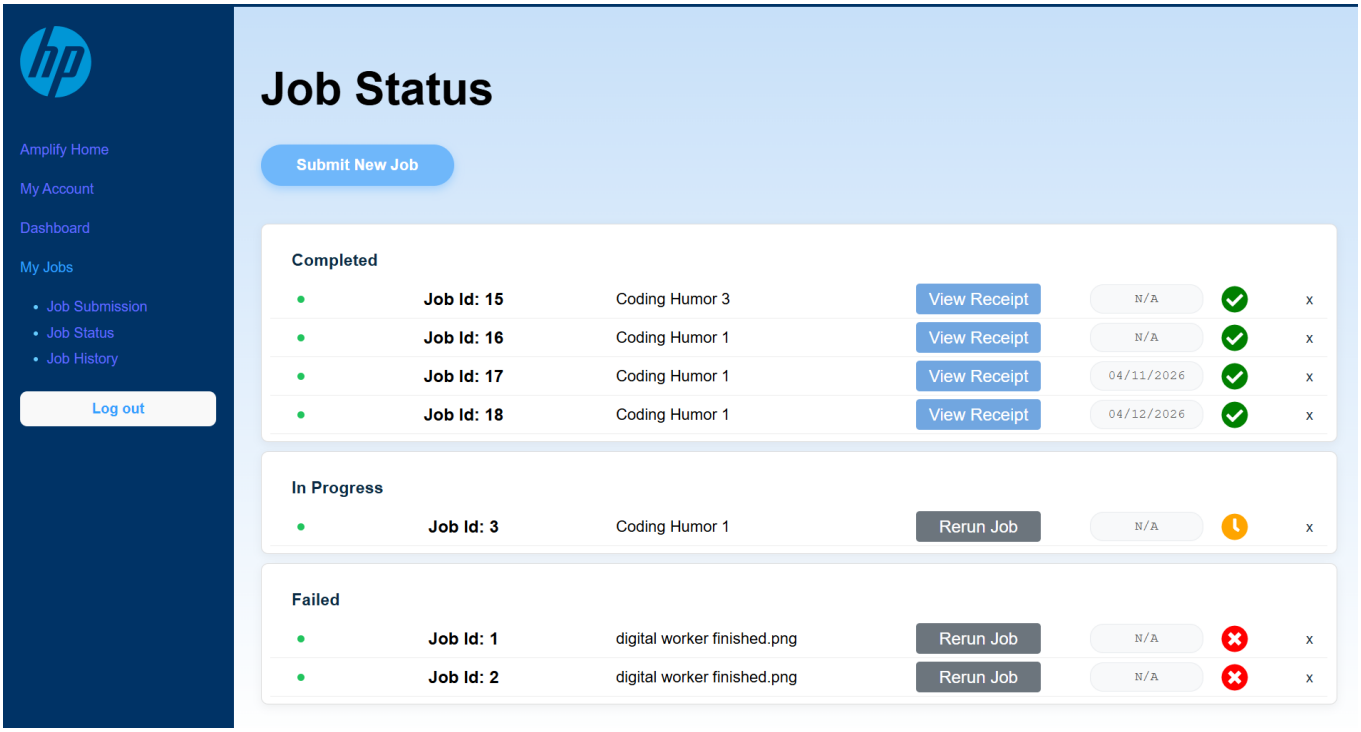


Job Status

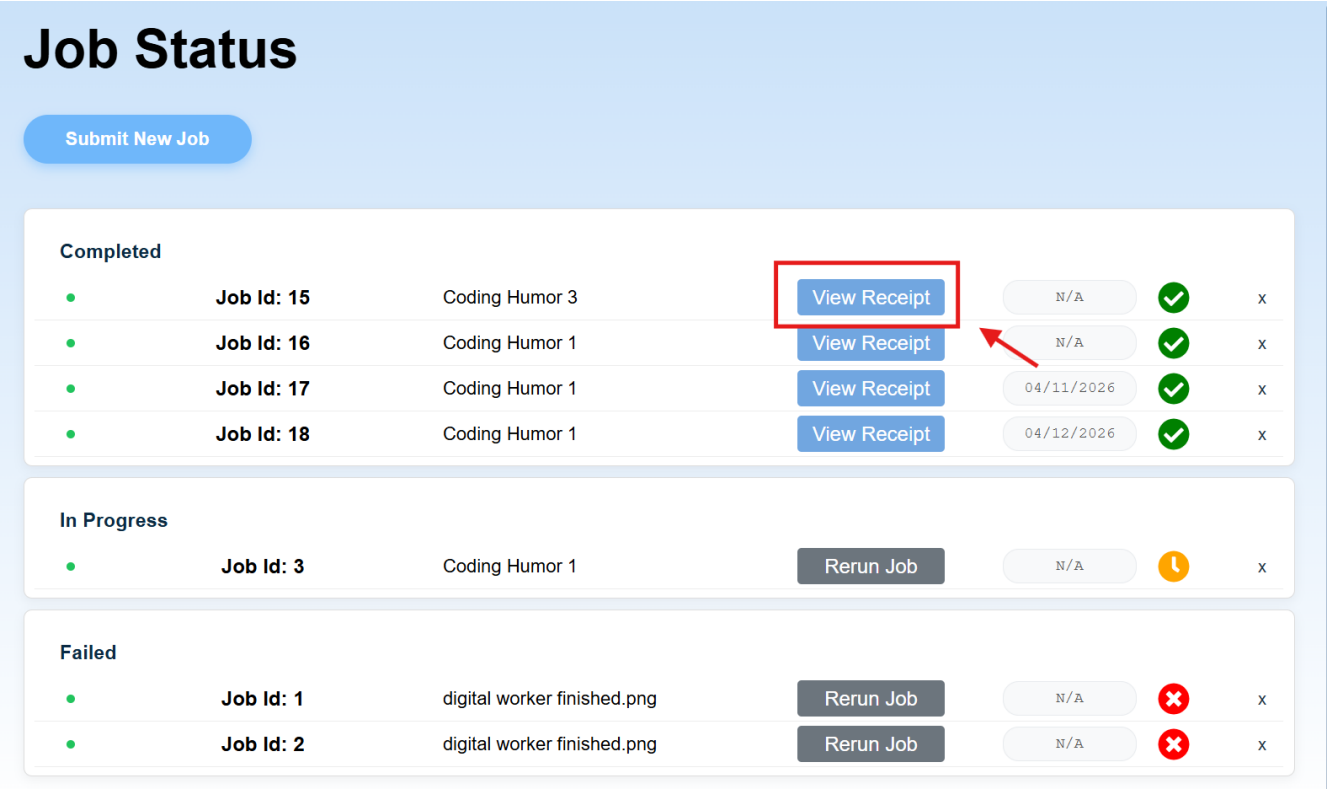
The job status page is accessible from either the ‘Amplify Home’ link or the ‘Job Status’ link. On the Job Status page, it shows all your currently active jobs. Your jobs can be in three different states: completed, in progress, or failed.

- Finished: Your job was successfully processed on our end and were able to receive your job request.
- In Progress: We are still receiving your job request. If a job is stuck in the in-progress status for a while, click on ‘Rerun job’ to send the request again.
- Failed: There was an error in receiving your job request. Please try clicking ‘Rerun job’ to send the request again.

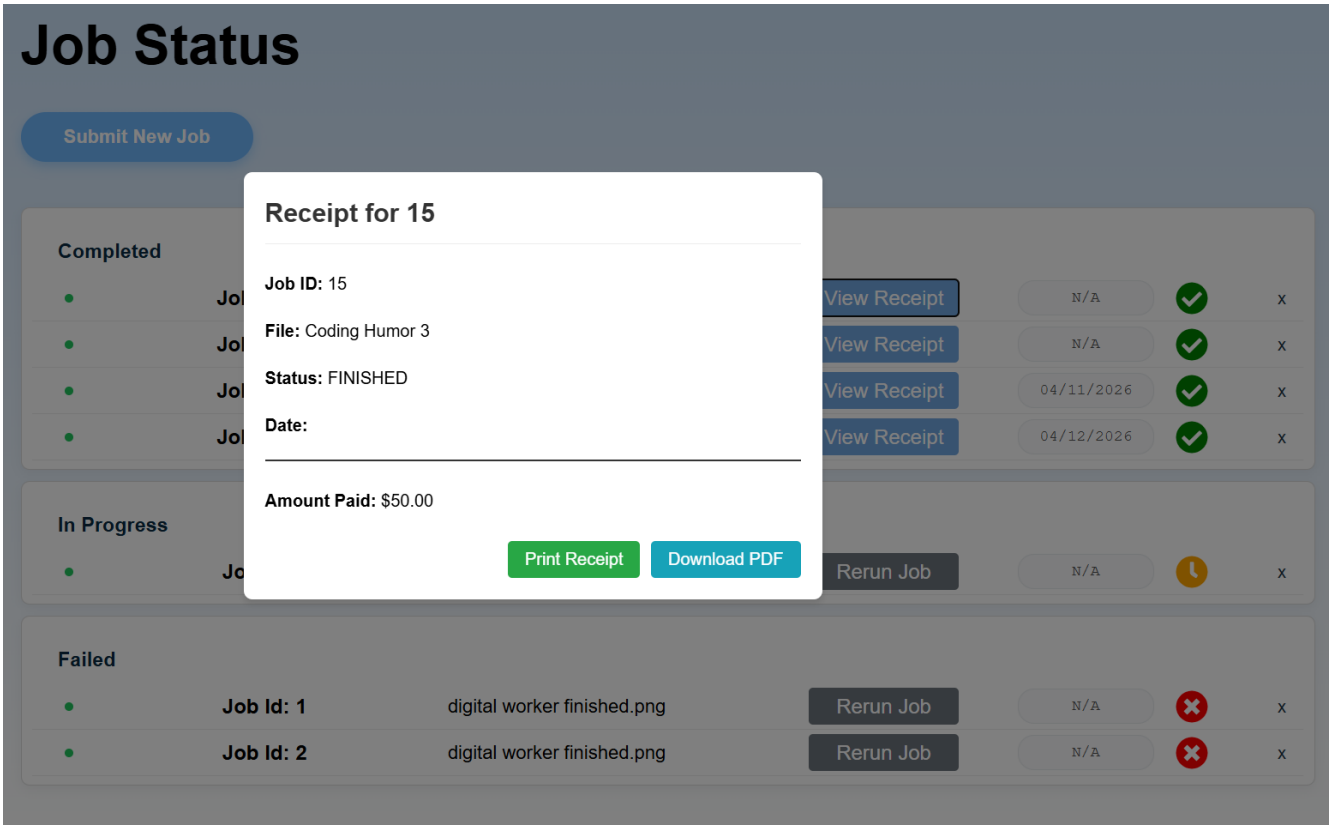
In addition to the states of your jobs, it also shows you the date the job was created and your receipt. You are also able to delete the job by clicking on the ‘x’ on the far right of each job. Clicking on the ‘x’ will only delete that specific job.



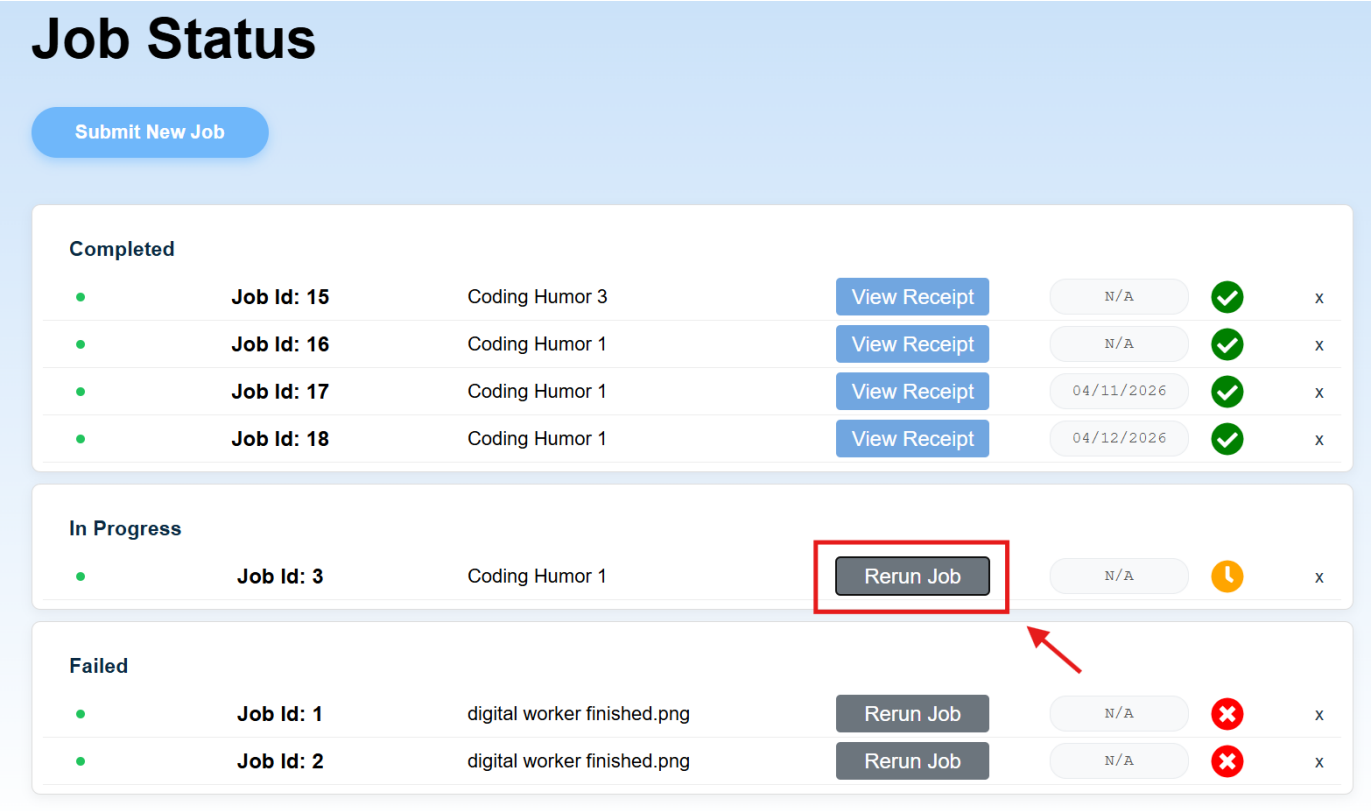
To view your receipt, click on the ‘View Receipt’ button.



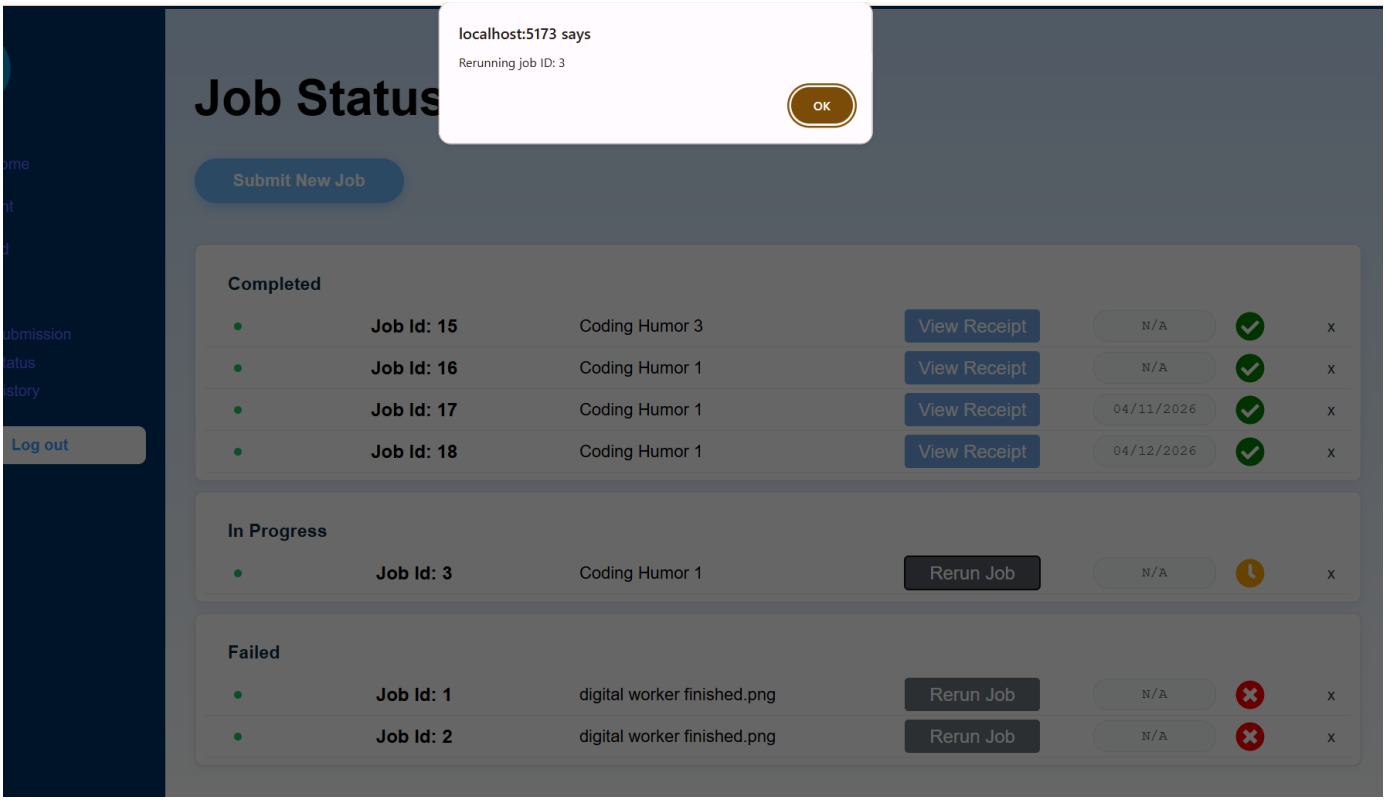
On the ‘Review Receipt’ popup, it will show you the job id number, the file name, the status of the job, the date that it was created, and the amount paid. You can additionally print the receipt from here or download the original file. You can exit this pop up by clicking escape or by clicking outside of the popup.



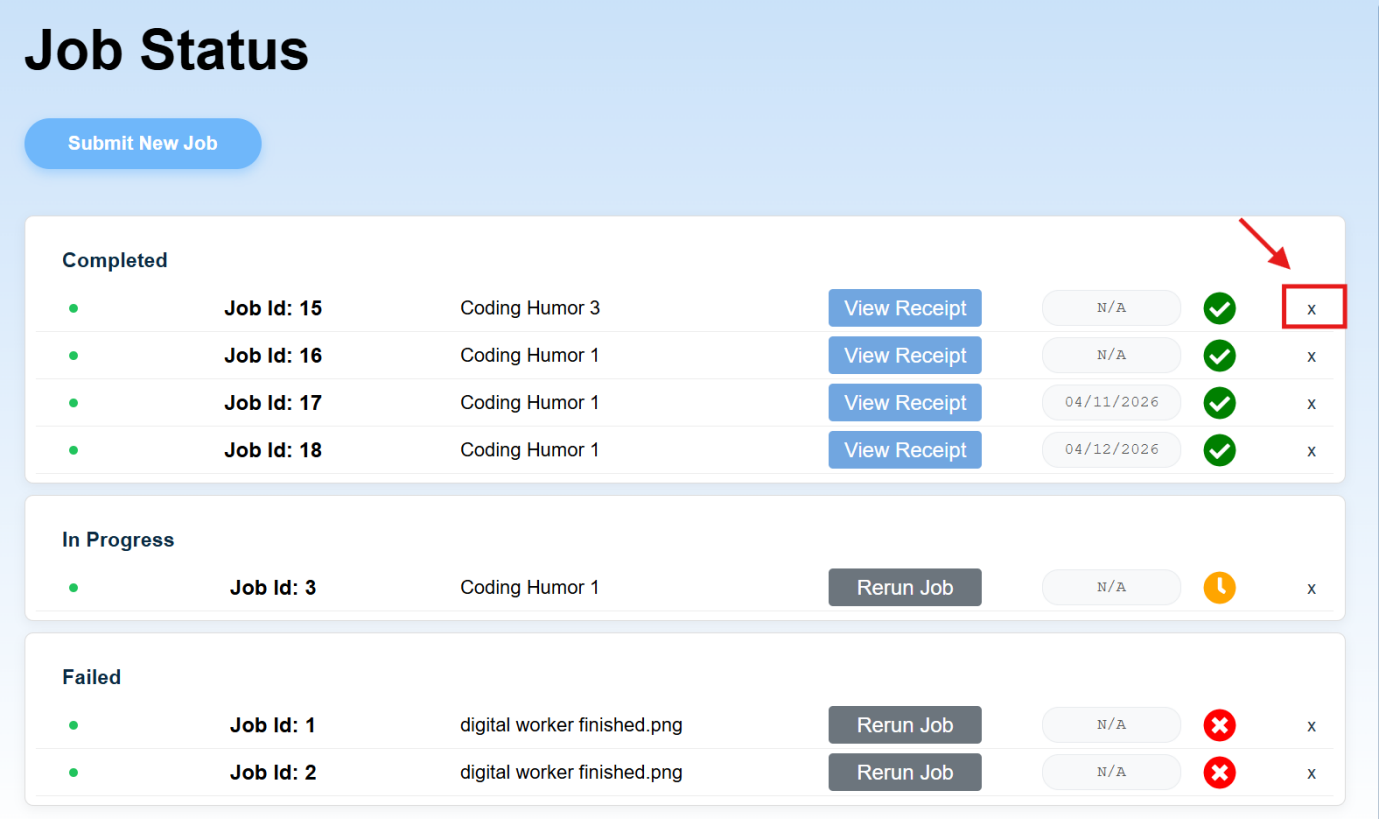
To rerun a job, simply click on the ‘Rerun Job’ button.



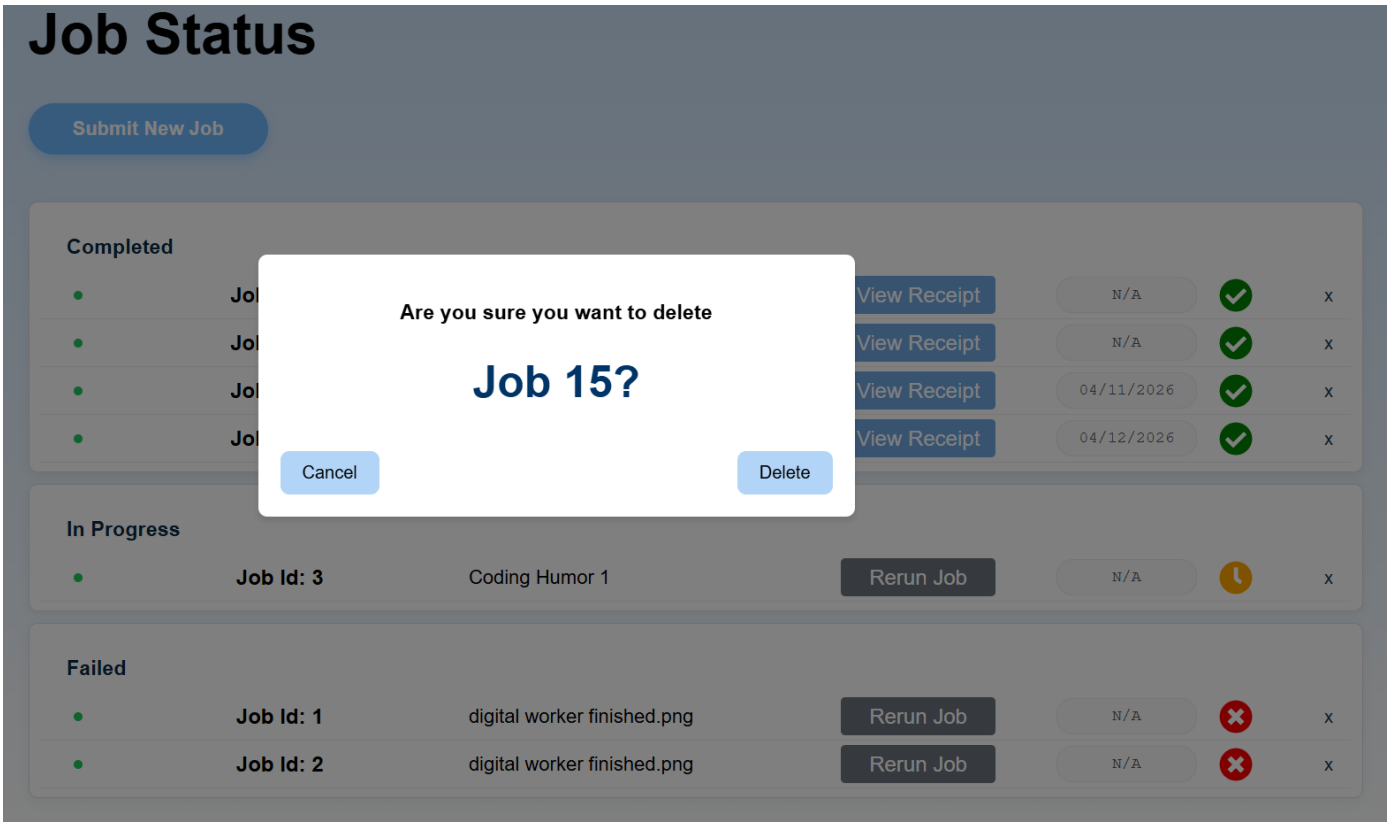
Once you click on that, it will have a page popup stating which job is being rerun.



If you are wanting to permanently delete a job, you can click on the ‘x’ on the right-hand side of the job.



After clicking on this, a popup will appear double checking with you if you want to delete the job. If you don’t click ‘Cancel’ and that will back you out of the popup. Otherwise, if you do want to delete, click the ‘Delete’ button.



Job History

To view your job history, click ‘Job History’ from either the ‘Amplify Home’ page or the ‘Job History’ link on the left side panel. Upon clicking this, it will show you every job that you have ever had, including deleted ones. The job history is designed to track changes in the status of the job and when that occurred.

This is the end of the guide.
Thank you for reading!
